

Portals to Make Farm Products Exports Easier

New Delhi: In line with the Digital India Initiative, the government has developed three online portals to make it easier to export farm products from India and reduce transaction costs.

The digital platforms, developed by the Export Inspection Council, have integrated the entire export food chain by linking primary production, chain catch, aquaculture pond, dairy farms and dairies.

'Sell Through a Fair Process' Brand Loyalty Key to Maruti's Success

The principal approval of shareholders would be secured through a postal ballot with the voting facility and not an extraordinary general meeting, the spokesperson said.

Maruti Suzuki's senior executive director for marketing and sales attributed the stellar performance on the "disruptions" that it undertook over the past three-four years to meet the aspirations of the Indian consumer.

Analyses at Sharekhan by BNP Paribas: "Maruti Suzuki is looking to have an order backlog right now. They have waiting 4.5 months for the Baleno, Suzuki, Swift and Dzire. The product pipeline is strong and we believe they will continue to outperform the industry in FY16."

Exporters Fish for Smaller Shrimp to Meet Demand

India tweaking shipments as smaller-sized shrimps of about 50 to 120 counts are trending all over world

Kochi: Rising demand for smaller shrimp is compelling Indian seafood exporters to tweak their shipments to suit the global palate. India has been traditionally strong in the big-size farmed shrimp ranging from 20 to 40 counts per kg, but now they are encouraging farmers to go for multiple harvests to meet the requirement for small shrimps, which could help the farmers in the long run.

farmers get paid for multiple harvests while they will be able to export more consignments. India is currently the top supplier of farmed shrimps in the world. Among the shrimps imported by the US, the share of India stands at 40%.
